Holiday Schedule - No service on these holidays

Christmas Day
Independence Day
Labor Day
Memorial Day
New Year's Day
Thanksgiving Day

When the holiday falls on a weekday, collections for the remainder of the week will be delayed by one day. There is no service interruption or delay when the holiday falls on a Saturday or Sunday.

Indoor Food Waste Collection

For a limited time, the City of Rancho Cucamonga is offering businesses indoor food waste collection containers to assist with separating food waste for recycling. The containers hold approximately 20 gallons and can be used in the kitchen. Supplies are limited and requests will be filled on a first come, first serve basis. If you have a business in Rancho Cucamonga and would like to request a free food waste container for your business, please use the QR Code to sign-up.

HOW ARE BUSINESSES AFFECTED?

Under SB 1383, businesses are required to:

- Subscribe to organic waste collection service provided by Burrtec.
- Provide information to new tenants before or within 14 days of occupation of the premises.
- Prohibit employees from placing organic waste in a container not designated to receive organic waste.
- Ensure employees, contractors, tenants, and customers have access to an adequate number, size and location of containers with appropriate labels and container color.
- Provide containers for the collection of all waste streams including trash, food waste and recyclables in all areas where disposal containers are provided for customers, except for restrooms.
- Annually provide information to employees, contractors, tenants, and customers about organic waste collection requirements and proper sorting of organic waste.

EDIBLE FOOD GENERATOR TIPS TO PREVENT FOOD WASTE

Here are some ways businesses can reduce food waste:

- **Plan and track:** Plan meals based on demand and track waste to identify areas for improvement.
- **Menu design:** Create menu specials that use ingredients that are close to their expiration date. Remove items that don't sell well.
- **Staff training:** Train staff on how to minimize food waste, including proper temperature management and stock rotation.
- **Store food properly:** Store food in the refrigerator and use airtight containers for grains.
- **Monitor production:** Weigh food at each stage of production to identify and correct production loss.

California produces nearly half of the nation's fruits and vegetables, yet 1 in 8 Californians struggle with food insecurity, or lack of access to food that one needs to live a healthy lifestyle.

With the passing of Senate Bill 1383 (SB 1383), the State of California has mandated surplus food recovery to help combat the effects of methane gas on the environment. The bill requires commercial edible food generators to:

1. Arrange to recover the maximum amount of excess edible food that would otherwise go to landfills.
2. Establish a written agreement with any/all partnering organizations/services that accept edible food from your business.
3. Maintain records of all edible food recovery activities and receipts.
4. Provide copies of written agreement(s) with food recovery organization(s) each year.

- ✓ Chairs
- ✓ File cabinets
- ✓ Electronic waste
- ✓ Illegally dumped items
- ✓ Other misc. bulky items

NON-ACCEPTABLE ITEMS

- ✗ General Trash
 - ✗ Dirt
 - ✗ Concrete
 - ✗ Rocks
 - ✗ Treated Wood
 - ✗ Hazardous Waste
- Visit <https://sbcfire.org/smallbusinesshazardouswaste/> for proper disposal.

State Required Contamination Monitoring of Recyclables

California state law SB 1383 requires jurisdictions to monitor trash, recycling, and organics barrels to minimize contamination. Trash and other contaminants in the recycling or organics collection container(s) could result in a fee and non-collection due to contamination. If contamination is found, contamination tags (as shown to the right) will be affixed to the container lid. After the first notice, customers may be charged a contamination fee and the container will not be serviced as recyclable; it will be subsequently serviced as trash. Please note: the contamination fee will be automatically assessed if hazardous or bio-hazardous materials are placed in any collection container. Not sure about what goes in each container? Contact our Burrtec Customer Service at (909) 987-3717 for assistance. As always, thank you for your continued support and cooperation!

Mandatory Commercial Recycling - Is Your Business in Compliance?

Senate Bill 1383 mandates all businesses and multi-family residential dwellings to establish and maintain recycling service.

Recycling not only conserves our natural resources, but can save money by reducing waste disposal costs. Burrtec recycling coordinators can assist in selecting the appropriate recycling service level, along with the necessary education and outreach to residents and managerial staff. Please contact Customer Service for more information at (909) 987-3717.

Attention Food Service Providers

Existing state law requires businesses that generate four cubic yards or more or two cubic yards or more of commercial solid waste per week to implement a recycling or organics recycling program. Assembly Bill 827 requires food establishments that provide trash containers for products purchased and consumed on the premises to also provide properly labeled containers for recyclables and organic waste (food waste) for materials purchased on the premises for immediate consumption. These containers must be placed adjacent to trash containers.

Requirements:

- AB-827 requires collection containers at the front to be visible, accessible and labeled.
- This law affects businesses that sell products that are meant for immediate consumption.
- Full-service restaurants where employees bus and clean tables are exempt but must provide labeled collection containers adjacent to trash containers for employees/staff to separate post-consumer recyclables and organics.

YOUR SORTING GUIDE - WHAT GOES WHERE?

Black Bin/Barrel is for trash

BAG ALL TRASH - DO NOT ADD HAZARDOUS WASTE
